

а) $\triangle DOC \sim \triangle BOA$

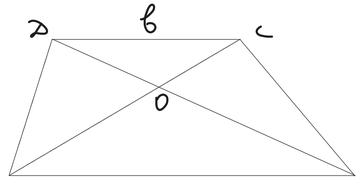

$\frac{AB}{DC} \overset{?}{=} \frac{OB}{DO}$

$\frac{x}{25} = \frac{4}{10}$

$x : 25 = 4 : 10$

$x = 0{,}4 \cdot 25 = 10$

б)

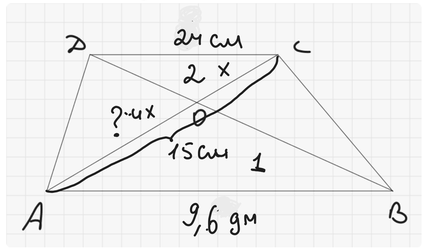

$\frac{AO}{OC} ; \frac{BO}{OD}$

$\triangle DOC \sim \triangle BOA \Rightarrow$

$\frac{AB}{DC} = \frac{OB}{DO} = \frac{AO}{OC} = \frac{a}{b}$

$\frac{a}{b} = \frac{c}{d} \Leftrightarrow b \cdot c = a \cdot d$

в)

$\frac{AO}{OC} = \frac{AB}{DC} = \frac{96\,[см]}{24\,[см]}$

$\frac{AO}{CO} = \frac{4}{1} \rightarrow AO = 4CO$

Пусть $CO = x$, $AO = 4x$

$AC = 15$; $AC = AO + CO = 15$

$4x + x = 15$

$5x = 15$

$x = \frac{15}{5} = 3$

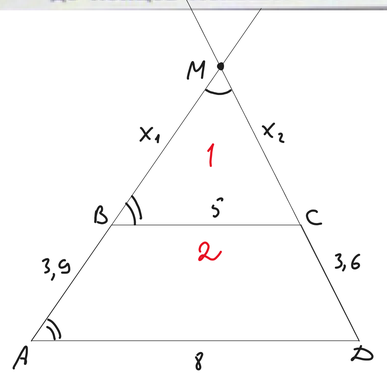

$CO = 3$ см

$AO = 12$ см

8 2

$\frac{8}{2} = 4$ [раз]

554 Основания трапеции равны 5 см и 8 см. Боковые стороны, равные 3,6 см и 3,9 см, продолжены до пересечения в точке M. Найдите расстояния от точки M до концов меньшего основания.

$MB = ?$

$MC = ?$

$\triangle 1 \sim \triangle 2 \Rightarrow$

$\frac{BM}{AM} = \frac{CM}{DM} = \frac{BC}{AD}$

$\frac{x_1}{x_1 + 3{,}9} = \frac{x_2}{x_2 + 3{,}6} = \frac{5}{8}$

$\frac{x_1}{x_1 + 3{,}9} = \frac{5}{8}$ $\quad$ $\frac{x_2}{x_2 + 3{,}6} = \frac{5}{8}$

$x \ldots$ $\quad$ $\ldots$

$x_1 = \ldots$ $\quad$ $x_2 = \ldots$
